Leverage News to Inform Strategic Decision Making

Technical executive
passionate about
solving complex
business problems by
deploying AI, NLP,
Machine Learning and
Big Data solutions

Nick Kadochnikov

Distinguished Engineer

📍 Chicago, IL | +1 847 805 2734 | nkadochn@us.ibm.com

Nick is a Distinguished Engineer and a Data Scientist in GBS CBDS, focusing on the development of Cognitive Enterprise capabilities. These initiatives combine the power of Machine Learning, Deep Learning and Big Data analytics with Artificial Intelligence and Natural Language Processing to enable intelligent, data-driven decision making based on the multitude of both structured and unstructured data sources. Applications of AI capabilities cover the majority of enterprise operations, including supply-chain, sales, marketing, finance, procurement and legal functions.

Nick was also responsible for development and deployment of Data Science Platform and infrastructure within IBM, where he was working closely with Chief Data Office and Watson Data Platform teams to deliver robust analytical capabilities for both internal and external use.

Academic Experience

Nick is serving as a faculty at the University of Chicago Data Science Masters Degree program, where he teaches “Big Data Platforms” and “Natural Language Processing and Cognitive Computing” courses as well as supervising numerous capstone projects and engaging with industry partners.

Technical Skills

- AI and Machine Learning: neural networks and deep learning for computer vision and NLP {CNN, RNN, LSTM, GRU}; boosted trees; linear and non-linear techniques; time-series analysis; association rules
- Natural Language Processing {BERT; Word2Vec; LDA; LSA} and Elasticsearch
- Big Data: Hadoop, Spark, SparkML and relational databases
- Hybrid and Public Cloud: containerization environments and micro-services: Docker, Kubernetes

Personal

Love everything high speed: auto racing, go-karts, skiing and rollerblading

Potential impact on ...

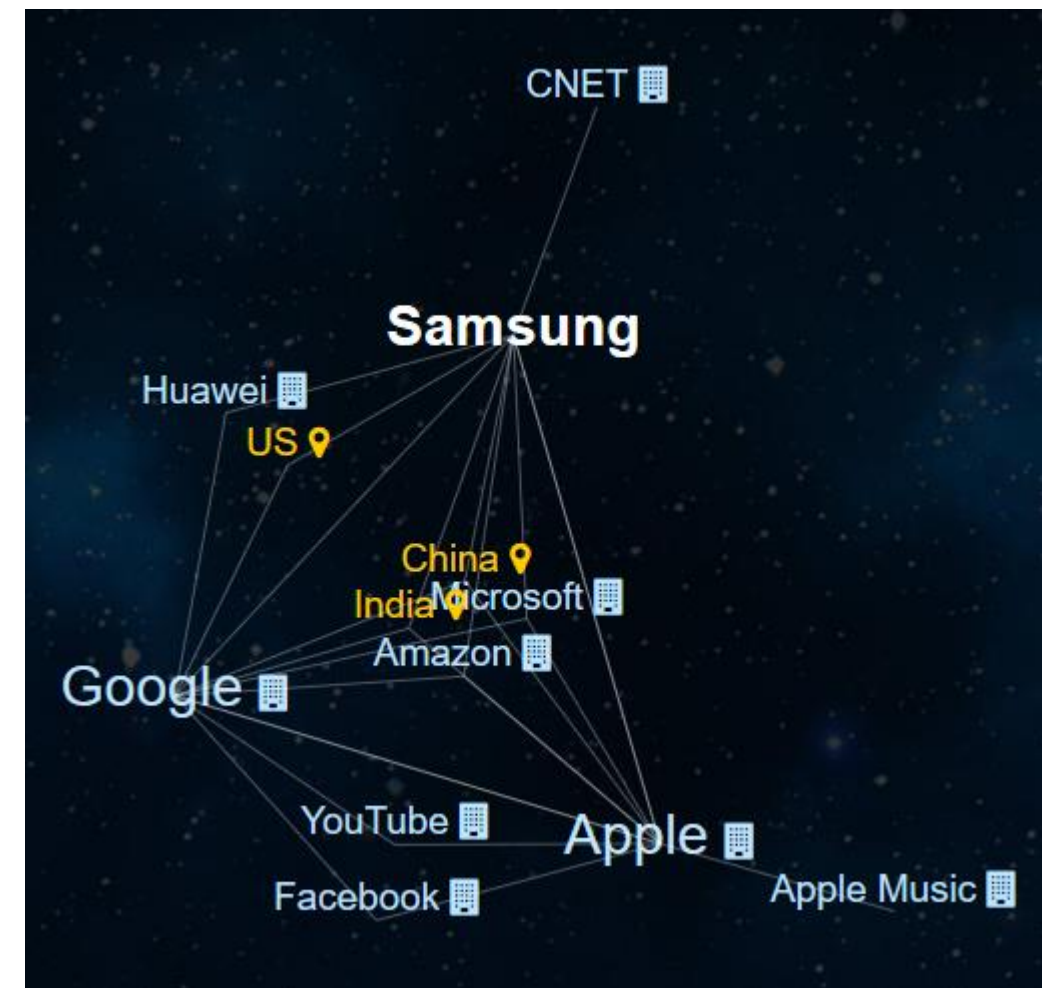

[21 open POs for parts from Hong Kong with Delivery Date up to 1 Jul 2019 \(total value of \\$987K\)](#)

I recommend reviewing Open POs for shipments through Hong Kong.

Basis for this recommendation:

- There is a risk to Supply Shortage that is of Low Impact and High Likelihood.
- Event affects short-term deliveries up to 1st Jul 2019
- The impact is on 21 open POs with a total value of \$987K.

Real-time, automated, unbiased market and competitive intelligence solution

\$76B spent on market intelligence and competitive research in 2018

<https://www.consultancy.org/news/59/global-market-research-industry-worth-76-billion-top-10-companies>

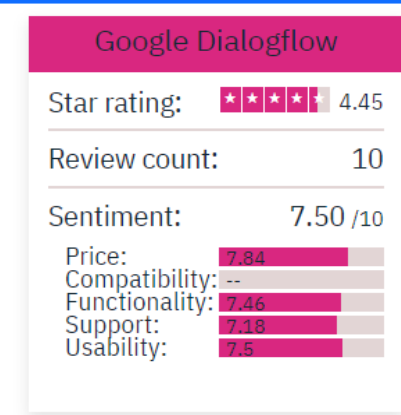

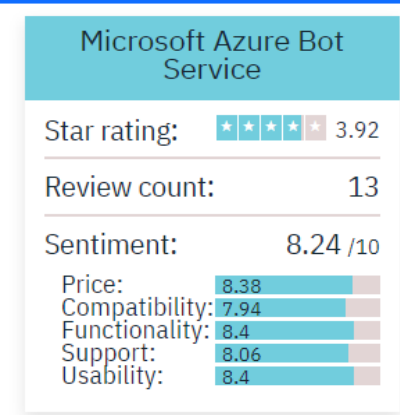

From Insights to Action

Watson Assistant has a competitive pulse of 5.2/10, determined as #1 since October 2018

- In Sep. 2018, **Watson Assistant** jumped from the 4th to the 1st place in overall competitiveness
- In the same period, Amazon Flex went from the 1st to the 3rd, and Google DialogFlow went from the 2nd to the 5th place

Watson Assistant is competitive pricing; but it **needs** to focus on improving its **compatibility** and **usability**
